PROFESSIONAL SUMMARY

Final year CSE student with hands-on experience building full-stack, REST API-driven systems across web and mobile platforms. Comfortable picking up unfamiliar tech stacks on the job, solves real-world problems end-to-end, and communicates clearly with both technical and non-technical audiences. Seeking a software development role to apply full-stack engineering skills to building scalable, real-world products.

EDUCATION

Loyola-ICAM College of Engineering and Technology (LICET), Chennai 2023 – 2027

B.E. (Honors) Computer Science and Engineering | Final Year | CGPA: 8.37

St. Michael's Academy, Adyar, Chennai

ISC (12th) | 93.5% 2022 – 2023

ICSE (10th) | 97.5% 2020 – 2021

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, Dart

Frameworks & Libraries: React.js, Node.js, Flutter

Databases: MySQL, Supabase (PostgreSQL), Firebase (NoSQL)

Core CS: OOP, REST APIs, MVC, Data Structures & Algorithms

Tools & Platforms: Git/GitHub, VS Code, Figma, Apache Tomcat, Postman

AI/ML: LLM-assisted development, NLP pipelines, confidence-scoring algorithms

INTERNSHIP EXPERIENCE

VouchTails — Software Development Intern (Backend & Mobile) Jun 2026 – Present

- Developed backend services (Node.js, Express, Prisma, Supabase) and a mobile app (Expo React Native) for a pet-care marketplace startup.
- Built i18n infrastructure, Supabase Realtime authentication, and intake reconciliation workflows across the platform.

ICAM Nantes, France — International Engineering Internship (Summer Exchange) Jun 2025 – Jul 2025

- Selected for a summer exchange program at ICAM Nantes and worked alongside an international, multicultural cohort of engineering students on a hands-on renewable-energy project.
- Designed, built, and tested a functional wind turbine prototype (charged a 5V mobile battery) through an iterative engineering process, from concept and design through assembly and testing.

PROJECTS

TraX — Business Sales & Expense Tracker | React.js, Supabase, PostgreSQL

[Live Demo](#)

- Built a full-stack business management platform with a real-time profit dashboard, multi-branch management, and role-based security, using Supabase for real-time data sync and REST APIs for all data operations.

Restaurant POS System | React.js, JavaScript

[GitHub](#)

- Designed a modular, customisable Point-of-Sale system for restaurants, cafes, and fast-food chains with order tracking, billing, and role-based access control across business types.

LookBook — Smart Wardrobe Manager | Flutter, Dart, Firebase

[GitHub](#)

- Built a cross-platform mobile app with Firebase integration for intelligent clothing matching from a personal wardrobe database, covering UI through backend.

ACHIEVEMENTS & GLOBAL EXPOSURE

Best Paper Award, NIAC 2026

National-level recognition

- Published a confidence-aware re-ranking framework for language variant identification in noisy real-world environments; designed the NLP pipeline and confidence-scoring algorithms.
- Ran the full research cycle — literature review, implementation, evaluation, and presentation of findings at a national conference.

Selected for a **Summer Exchange Program at ICAM Nantes, France**, gaining international engineering and cross-cultural collaboration experience.
